SNOW + promotion

Gesellschaft für moderne Werbung und Kommunikation mbH

Whether for snow decorations, as a base for a snow sculpture or to build a snow bar – a snow block can be used for many different occasions. It also can be prepared by us to be used as a refrigerator for cold drinks or as a "treasure block" with snow-covered surprises. The snow blocks are also ideal for raffles and product promotions.

The snow blocks are produced on the euro pallet with the SnowBOX snow machines at a positive ambient temperature, foliated and then stored in a cold store until delivery. The snow consistency can vary depending on the production conditions. The snow has firm like consistency. Only drinking water without any additives is used for snow production. The delivery by truck with a loading platform is carried out by refrigeration transport company. Delivery by hand lift.

All prices in Euro net plus legal VAT and transport. The general terms and conditions of snow+promotion GmbH for events & promotion apply.

General information and remarks for snow blocks

- Due to the individual manufacture of the blocks, the dimensions may differ slightly. Cracks or icing can appear. These various characteristics are not a defect.
- Note concerning processing: Depending on the application of the snow block, there are various processing possibilities. Always keep in mind that the compressed snow as a block is upright. In order to process the snow, we recommend sharp-edged spades and aluminum scoops as basic equipment for manual processing. The use of a chain saw is ideal for the quick distribution or the creation of a certain shape or figure of the snow block. When using as snow decoration, a snow blower is recommended. For further processing, please always use completely cleaned and stainless tools to avoid contamination of the snow.

Transport costs snow blocks

| Week days distance | 200 km | 300 km | 400 km | 500 km | 600 km | 700 km | 800 km | 900 km | 1000 km |
